Lab Report No: 07

Course Title: Research Methodology

Course Code: ICT-3208

Lab Report on: How to Write a Conference Paper

Submitted By	Submitted To
Name: Kuldip Saha Mugdha ID: IT22018 Year: 3 rd Semester: 2 nd Session: 2021-2022 Dept. of ICT, MBSTU	Dr. Md. Badrul Alam Miah Professor Dept. of ICT, MBSTU

Date of Performance: 07-01-26

Date of Submission: 14-01-26

1. Introduction

A conference paper is an important part of academic research. It allows researchers and students to share their ideas, findings, and innovations with others. Writing a good conference paper requires a clear structure and proper organization. Many students face difficulties because they do not know how to arrange sections or what information to include.

The objective of this paper is to explain how to write a conference paper step by step in an easy way. This will help beginners understand the basic format and improve their academic writing skills.

2.Key Objectives:

The main objectives of this study are:

- To explain the concept of a conference paper
- To describe the standard structure of a conference paper
- To explain each section of a conference paper in simple language
- To help students avoid common mistakes in conference paper writing
- To improve students' understanding of academic and research writing

3. Methodology

This study follows a descriptive research approach. Information was collected from:

- Research methodology course materials
- Conference paper templates and guidelines
- Academic articles and online resources

The collected information was carefully analyzed and organized to present a clear and simple explanation of how to write a conference paper. No experimental data were used in this study, as the focus is on understanding the writing process.

4. Importance of Conference Papers

Conference papers are important for several reasons:

- They help researchers share new ideas and innovations
- They allow students to improve research and presentation skills
- They provide opportunities to receive feedback from experts
- They help build academic and professional reputation

Writing a good conference paper is the first step toward publishing research work.

5. Structure of a Conference Paper

5.1 Title and Author Information

The title should be clear, short, and related to the main topic of the paper. It usually contains 10–15 words. Author names, affiliations, and contact details are written below the title.

5.2 Abstract

The abstract gives a brief summary of the entire paper. It explains the problem, objectives, method, and conclusion in one paragraph. A good abstract helps readers quickly understand the purpose of the paper.

5.3 Keywords

Keywords are 4–6 important terms related to the paper. They help the paper appear in academic searches and databases.

5.4 Introduction

The introduction provides background information about the topic. It explains why the topic is important and what problem the paper addresses. It also clearly states the objectives of the paper.

5.5 Related Work

This section reviews previous research related to the topic. It shows what other researchers have already done and highlights the research gap that the current paper focuses on.

5.6 Methodology

The methodology section explains how the research was conducted. It includes:

- Research design
- Data collection methods
- Tools or techniques used

This section should be clear so that others can understand and repeat the study.

5.7 Results

The results section presents the findings of the research. Data are usually shown using tables, charts, or figures. This section only presents results and does not explain them in detail.

5.8 Discussion

The discussion explains the meaning of the results. It compares the findings with previous studies and explains whether the research objectives were achieved.

5.9 Conclusion

The conclusion summarizes the entire paper. It highlights the main contributions, mentions limitations, and suggests directions for future research.

5.10 References

References include all books, articles, and websites used in the paper. Proper citation style such as IEEE or ACM must be followed.

6. Common Mistakes in Conference Paper Writing

Some common mistakes students should avoid are:

- Writing a long and unclear title
- Including unnecessary information in the abstract
- Weak introduction without clear objectives
- Poor organization of sections
- Incorrect citation and referencing

Avoiding these mistakes improves the quality of the paper.

7. Discussion of Limitations

This study explains the basic structure and writing process of a conference paper in a simple way. It shows that following a proper format and clear organization makes a conference paper easy to understand and more effective. The study is helpful for beginners who want to improve their academic writing skills.

However, this study has some limitations. It is mainly based on general guidelines and does not include practical writing examples or experiments. Also, conference requirements may vary, so all rules may not apply to every conference. Despite these limitations, the study provides a clear basic idea of how to write a conference paper.

8. Conclusion

This study presents a simple and clear explanation of how to write a conference paper. It describes the basic structure, important sections, and general writing guidelines. By following these steps, students can write organized and effective conference papers. Although the discussion is general, it provides a strong foundation for beginners to improve their academic and research writing skills.
