## **Introduction:**

HTML is the standard language for creating webpages. Advanced HTML allows embedding multimedia elements, documents, and dynamic features that enhance user experience. In this lab, we design a webpage that includes:

- Mathematical equations
- Scrolling text (marquee)
- Audio playback
- YouTube video embedded as a frame
- PDF embedded as a frame

This exercise demonstrates practical usage of advanced HTML tags and multimedia embedding.

## **Objectives:**

- To learn how to embed equations using HTML.
- To implement marquee for scrolling text.
- To add audio files to a webpage.
- To embed YouTube videos using .
- To embed PDF documents using .
- To design a functional, interactive webpage using advanced HTML features.

## **Working Principle:**

1. **Equations:** Can be displayed using Unicode symbols, HTML entities, or Math.
2. **Marquee:** Creates scrolling text using the tag.
3. **Audio:** Embeds audio using the tag with controls.
4. **YouTube Video as Frame:** Embedded using with the YouTube embed url.
5. **PDF as Frame:** Embedded using pointing to the PDF file.

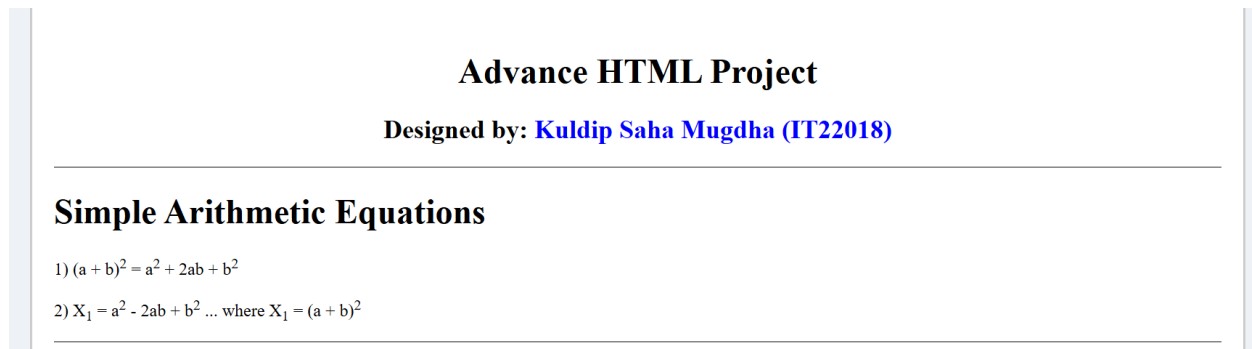

**Equations:** Can be displayed using Unicode symbols, HTML entities, or Math.

**Output:**

**Audio:** Embeds audio using the tag with controls.

**Code:**

```

**Output:**

**PDF File**

## **Conclusion:**

In this lab, we successfully designed a webpage incorporating advanced HTML features. We learned how to:

- Embed equations for mathematical representation.
- Implement marquee for dynamic scrolling text.
- Include audio files with playback controls.
- Embed YouTube videos for interactive content.
- Display PDF documents directly in the webpage.
